Tel Aviv, IL
noam@10ne.org
+972-544-921-499

Tech

Go, Python, Javascript, Node.js, Java, Groovy, Elm, Docker, Linux, Git, MongoDB, Redis, Kubernetes, PostgreSQL, BigTable, Terraform, Helm, GCP, AWS, Arduino, Elasticsearch, MySQL, Gradle

Work Experience

2020 - Current, Healthy.io - Research Task Force Leader

Guiding a diverse and talented group of data scientists, algorithm developers, ML engineers, and software engineers, to build SPOT - a digital wound tracking system.
The team is responsible for researching and developing new features from a POC to a production ready solution.

2019 - 2020, VanMoof (The Netherlands) - Software Engineer

Joined VanMoof as the first in house R&D fullstack software engineer.

Worked with the mobile application developers to build:

- A bicycle ride tracking system
- Bicycle diagnostics system
- IoT firmware/software POCs

Co-lead development of software engineering practices and culture in the company.

2016 - 2018, Healthy.io - Lead Backend

2015 - 2016, Codefresh - Senior Software Engineer

2008 - 2015, JFrog - Founding Team Member and Lead Developer

2005 - 2008, IDF - Developer and Team Leader

Education

Enrolled in various Open University courses - Mathematics, Philosophy, CS, Physics and History.
Coursera - Stanford's Machine Learning course

Languages

English - Native, **Hebrew** - Native, **Dutch** - A1

Misc.

Conferences:

2018: not PyCon - Co-organizer
2018: [Tel-Aviv Rust Meetup](#) - Co-Organizer
2014-2019: Speaker at various meetups, national and international conferences
